- 16) Main Roads
- A) White-Unable to Assess
 - B) Green-Can Pass Emergency Vehicles
 - C) Yellow-Can Pass Emergency Vehicles but Expect Significant Delays
 - D) Red-Impassible by Emergency Vehicles

Reporting Tips: Items with White reports may be omitted. Green items are necessary for the EOC to assess the complete picture and are highly encouraged. Red Items require a specific location. For the purposes of the check-in practice, the location can be omitted or simulate one.

Example: "W6IK CSR; Items 9 and 10, Green. Items 11 - 16 Green." It's that simple! Or you can simulate a scenario and report simulated codes other than Green just for practice.

As far as reporting to the EOC via WINLINK; The message will go faster if you enter status as text in the message body as opposed to attaching an ICS-213 or similar.
