

Southern Arizona Emergency Communications HF/VHF Net

20 FEB '21
WA9TKK - NCS

This is WA9TKK-Mike, Net Control Station for the Southern Arizona Emergency Communications HF Net. This net meets Saturdays at 0715 hrs MST on 3863 kHz (or another band), by authority of the FCC and by the direction of the Pima County Office of Emergency Management. This is a directed net, organized to handle emergency traffic and net training. Following roll call, I will open the net for late member and visitor checkins. Break with your call sign at any time if you have emergency traffic. ARE THERE ANY QST's?... The net list follows:

Are there any visitor or late member check-ins? Again, are there any visitor or late member checkins? Any relays?

This is WA9TKK, NCS for the Southern Arizona Emergency HF Net. Now we'll go around again for comments.

[Closing] This net is formally closed at **0738** MST and will meet again next Saturday on 3865 kHz (or alternate band) at 0700/0715 hrs MST. Thanks for your participation! Have a good week all! 73, **[Sign off]**.

Net notes:

Per suggestion from KE7MU, net moved up to 3865 KHz per QRM.

Many stations again reported my signal as being very weak or unreadable.

Thanks to KE7MU and W7LUX for net relays.

After the net, KD7OIW and myself tested 40m for possible net use. Both our signals were unreadable including 100W key-down signals.

Also checked with KD7XP on 2m and asked him if 7254 KHz was ever used as a net frequency. He said years ago but was abandoned due to poor propagation at ab

Also discussed use of 60m due to better propagation, but was discounted due to not many people have an antenna that works on 60m and that there are only 5 availa channels and could conflict with other planned MARS/amateur exercises.
